Crying.—A French physician is out with a long dissertation on the advantages of grooming and crying in general, and especially during operations. He contends that grooming and crying are the two grand operators by which nature allays anguish; that those patients who give way to their natural feelings more speedily recover from accidents and operations than those who suppose it unworthy for a man to betray such symptoms of cowardice as either to cry or groan. He tells of a man who reduced his pulse from 126 to 60 in the course of two hours by giving vent to his emotions. If people feel at all unhappy about any thing let them go to their rooms and comfort themselves with a loud sob, and they will feel a hundred per cent. better afterward. In accordance with the above, the crying of children should not be too greatly discouraged.

Tomatoes were first used in this country as an edible in the year 1819, but they did not come into general use until more than twenty years subsequent to that date.

If William Cullen Bryant lived until next November he will have reached the age of eighty. It is proposed to celebrate the event by an artistic testimonial, costing about five thousand dollars, to consist of a silver and gold vase, so wrought as to express his relation to American literature and life.
